Metaphysical review

In the President's fingerprints we have worlds upon worlds of issues. The “build back better” has become B3W, “build back better world”. Our various efforts to develop self, same, group, and world have had innumerable effects. That inertia has absorbed a tremendous acceleration with the presence of awareness and reason.

The LOVEINT fiasco continues with *law enforcement* noses in law books, or not. (“Polluter Page”, Senator Whitehouse).

The SNOWDEN component includes the concept of *personal intelligence products* as the moral fortitude to find voice with intelligence. (“Very carefully.”, General Nakasone).

A JUSTICE component follows or shares these issues of law and society, most recently best illustrated by absurdity of the case of E. Jean Carroll: “The DOJ is doing everything to clean up Trump's corruption, except dropping his defense.”.

The POWER aspect of U.S. AID is presently engaged by President Macron, as well. Perhaps, “How much of world wide violence is political noise?”. (And how much is unreasonable historical attachment?). And how much of that is the political disinformation of manipulation?
