Physical socialism

The term *physical socialism* is intended to represent the recognition of power (π) (work (ρ) over time (τ))

$$\pi = \rho/\tau$$

in society and economy. In the physical reference frame, social issues of law (λ), government (γ), and economy (ρ) have a temporal logic of development and evolution.

$$\sigma = \lambda + \gamma + \rho + \tau$$

Therefore population (π) is in that frame.

$$\sigma = \pi + \lambda + \gamma + \rho + \tau$$

That is the physical reference frame of society as familiar to politics.

In this frame, *physical socialism* contrasts to *physical capitalism* as the conception of power is sovereign or subjugated [Metaphysical review 2021/06/03].
