Metaphysical reference frame system

Seeing a bluebird toss some leaves as he hunts his dinner, I'm reminded of the analytical exercise found in the observance of the displacement of those few leaves. In $\alpha\phi\lambda$ we find the familiar sympathy for dining. In $\alpha\phi\tau$ we thank eternity for the innumerable splendors of bluebirds. And in $\sigma\phi\tau$ we caution ourselves against the annihilation of environment and, thereby, of life.

$$\alpha_{\phi} = \kappa_{\phi} + \psi_{\phi} + \delta_{\phi} + \lambda_{\phi}$$

The *individual metaphysical reference frame* ($\alpha\phi\lambda$) is microscopic: the familiar individual is sentient (κ), conscious (ψ), mortal (δ), and linguistic (λ). [2021/06/09 0 and 1, 2021/06/12 0]

$$\alpha_{\phi} = \kappa_{\phi} + \psi_{\phi} + \delta_{\phi} + \lambda_{\phi} + \tau_{\phi}$$

The *individual of humanity millenia* ($\alpha\phi\tau$) is a temporal microscope on the metaphysical individual in sentience (κ), consciousness (ψ), mortality (δ), language (λ), and time (τ). [2021/06/12 0]

$$\sigma_{\phi} = \pi_{\phi} + \lambda_{\phi} + \gamma_{\phi} + \rho_{\phi} + \tau_{\phi}$$

The *global social reference frame* ($\sigma\phi\tau$) is macroscopic: population (π), law (λ), government (γ), economy (ρ),

and time (τ). [2021/06/03 1, 2021/06/04 1, 2021/06/05 1, 2021/06/06 0, 2021/06/07 0]
